Backend engineer with production experience in Python, FastAPI, and AWS. Domain knowledge in Indian accounting workflows (GST, invoicing, reconciliation) with real integrations built on Zoho Books and Tally.

## EDUCATION

**Indira College of Engineering and Management**  
*B.E. Computer Engineering — CGPA: 9.2 / 10*

Pune, MH  
2022 – 2026

## RELEVANT WORK EXPERIENCE

### Junior Backend Engineer

Jan 2025 – Present

*TaxBlock*

*Pune, MH*

- Designed a **Provider-Based Modular Architecture** using **Strategy & Factory patterns** — enabling new accounting providers (Zoho Books, Tally) to be onboarded without touching core business logic.
- Built a production **Zoho Books integration** in FastAPI with OAuth 2.0 for automated sync of Invoices, Bills, Transactions, and Contacts, eliminating manual data entry for end users.
- Implemented a **Singleton Tax Cache** + sliding-window rate limiter, cutting redundant API calls by **~40%** and preventing Zoho throttling in production.
- Engineered an **Entity Resolution Engine** and exponential backoff retry with pre-push payload validation, significantly reducing sync failure rates.

### Software Engineer Intern

Jan 2025 – Feb 2025

*Emsphere Technologies*

*Pune, MH*

- Optimized **VMS database schema in SQL**, conducted system testing on CLMS, and identified mobile app vulnerabilities improving system reliability.

## PROJECTS

### SpendGuard API | *FastAPI, PostgreSQL, SQLAlchemy, JWT, AWS EC2/RDS, Docker*

2025

- Cloud-native budget tracking backend enforcing monthly spending limits per category with real-time overage alerts; schema uses **GROUP BY, LEFT JOIN, COALESCE** aggregations for utilization analytics.
- Secured via **JWT auth** + bcrypt hashing; deployed on **AWS EC2 + RDS** with environment-based config and DB migrations.

### CloudBudget Sentinel | *AWS Lambda, EventBridge, Cost Explorer, SNS, DynamoDB, Python*

2025

- Serverless AWS cost anomaly detector — EventBridge triggers Lambda daily to poll Cost Explorer, evaluate thresholds, and send SNS alerts; alert history persisted in DynamoDB.
- Deployed via **AWS SAM CLI** with **least-privilege IAM roles** per function — demonstrates IaC and cloud-native security.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, C++, SQL

**Backend & APIs:** FastAPI, Node.js, Express.js, REST API Design, JWT, OAuth 2.0

**Databases:** PostgreSQL, MySQL, MongoDB, SQLAlchemy ORM

**Cloud & DevOps:** AWS (EC2, RDS, Lambda, SNS, EventBridge, IAM, CloudWatch), Docker, CI/CD, Git

**Architecture:** Factory, Strategy, Singleton, Adapter Patterns, MVC, RBAC, System Design

**AI Tools:** GitHub Copilot, Cursor, ChatGPT, Claude (dev workflow automation)

**Concepts:** DSA, OOP, Operating Systems, Networking, Agile/Scrum

## CERTIFICATIONS & LEADERSHIP

### Cloud Lead — Google Developer Student Club (GDSC)

2024 – 2025

*Led cloud workshops for 100+ students on AWS, GCP, serverless computing, and cloud-native deployment.*

### Cloud Computing — NPTEL, IIT Kharagpur | DevOps — Coursera

2024

*Cloud architectures, AWS/Azure fundamentals, CI/CD pipelines, Agile/DevOps practices.*
