EDUCATION

Indira College of Engineering and Management

B.E. Computer Engineering — CGPA: 9.2 / 10

Pune, MH

2022 – 2026

WORK EXPERIENCE

Software Developer

Feb 2026 – May 2026

TaxBlock

Pune, MH

- Developed and integrated third-party accounting platform connectors for automated data synchronization with **Zoho Books APIs** using **Python and Node.js**, enabling real-time bidirectional sync of Invoices, Bills, Transactions, and Contacts.
- Implemented a **connector-based architecture** using **Adapter and Factory design patterns** to support scalable onboarding of multiple accounting providers without modifying core business logic; managed delivery via **Jira** across full **SDLC** in Agile sprints.
- Built robust **hybrid-cloud** API handling including **OAuth 2.0 token refresh**, request validation, and sliding-window rate-limit handling — reducing redundant API calls and improving system availability.
- Maintained **test case sheets** and performed QA testing across design, development, and release phases; coordinated with stakeholders to document bugs, troubleshoot failures, and **present improvement proposals** in sprint reviews.

Software Engineer Intern

Jan 2025 – Feb 2025

Emsphere Technologies

Pune, MH

- Designed and optimized relational database schemas in **SQL Server**, conducted system testing on CLMS, and identified mobile app vulnerabilities — improved reliability and delivered **technical documentation** for maintenance.

PROJECTS

HemoConnect | github.com/mdoxy/hemoconnect

2025 – Present

- Led **design, development, and testing** of a healthcare blood donation and emergency coordination platform; designed a **config-driven priority scoring system** ranking requests dynamically using urgency, blood group rarity, wait time, and geolocation proximity.
- Architected a **heap-based request prioritization workflow** with auto-escalation for critical requests; implemented **field-level encryption** and RBAC for medical data isolation. *Published in ISJEM, December 2025.*

ServerlessSync | github.com/mdoxy/serverlesssync

2026

- Built a **highly available, cloud-native** event-driven pipeline on AWS — S3 uploads trigger Lambda to validate files, store metadata in DynamoDB, and deliver SNS notifications within 2 seconds; enforced **least-privilege IAM roles** per service.
- Automated **Glacier archival** reducing storage cost by **83%**; provisioned infrastructure via **Terraform** with CloudWatch alarms ensuring **high performance and maintainability** in production.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C++, Node.js, SQL

Backend Development: FastAPI, RESTful APIs, JWT Authentication, OAuth 2.0, Pydantic

Databases: MySQL, MongoDB, SQL Server, SQLAlchemy ORM, Data Modeling

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, DynamoDB, IAM, CloudWatch), Hybrid Cloud, CI/CD, Terraform, Git

System Design & Architecture: OOP, Design Patterns (Factory, Strategy, Adapter), MVC, RBAC, Scalable Backend Design

Tools & Workflow: GitHub, Postman, Linux, Agile/Scrum, SDLC, Jira, VS Code

AI Tools: ChatGPT, Cursor, Claude (development assistance, debugging, and code optimization)

CERTIFICATIONS

Introduction to DevOps — Coursera (IBM)

Completed IBM Coursera certification in DevOps, gaining knowledge of CI/CD pipelines, TDD, Agile methodologies, and continuous delivery practices.

2024

Cloud Computing — NPTEL, IIT Kharagpur

Completed a 12-week NPTEL certification in Cloud Computing from IIT Kharagpur, covering cloud architecture, hybrid-cloud models, security, and practical cloud applications.

2025
